Education

Indian Institute of Information Technology (IIIT), Kalyani Kalyani, West Bengal
Bachelor of Technology - Computer Science and Engineering *2020 - 2024*
CGPA: 8.53

Sri Chaitanya Junior College Kakinada, Andhra Pradesh
Intermediate - XII *2018 - 2020*
CGPA: 9.44

Experience

Software Development Intern Dec 2024 - Present
GYTworkz *Hyderabad*

- Built and optimized a dynamic web application using Angular, leveraging lazy loading and change detection to improve performance by **20%**.
- Integrated RESTful APIs with Angular Services and RxJS for efficient state management and seamless user experience.
- Developed advanced dashboards and visualizations in **Domo**, utilizing JavaScript, HTML, and CSS to build fully customized dashboards tailored to business needs.
- Worked on **ETL pipelines** and structured data warehousing using Domo Magic ETL for reliable data processing and analytics.
- Supported AI PoCs involving **text-to-SQL generation** using Wren AI, PostgreSQL, and AWS, enabling intelligent data querying.

Full Stack Developer - Freelance Sep 2024 - Nov 2024
Earth Emission *Remote*

- Developed responsive dashboards with real-time analytics using **Next.js** and **MySQL**, improving data visualization and user engagement by **15%**.
- Contributed to backend development tasks in **Python**, focusing on optimizing API performance and ensuring seamless front-end integration.
- Designed and prototyped user interfaces in **Figma**, enhancing user experience and reducing design-to-development time by **20%**.

Projects

WriteHub - AI-powered Blog Platform Live-Link
React, Express.js, MongoDB, Node.js, Hugging Face Transformers

- Developed a full-stack AI blogging platform leveraging **Hugging Face open-source models** for **summarization**, **sentiment analysis**, and **content enhancement**.
- Implemented secure **JWT-based authentication** to support user-specific dashboards, access control, and protected routes.
- Built a dynamic and responsive frontend using **React**, supporting blog categorization, real-time editing, and AI-assisted writing suggestions.
- Integrated **Express.js** backend APIs to handle blog CRUD operations, AI inference pipelines, and user management with **MongoDB** as the database.
- Added automated content summarization and sentiment tagging to improve blog readability and SEO using NLP pipelines from Hugging Face.

InfoChat AI – Intelligent Document & Web-Powered Chatbot Live-Link

FastAPI, React.js, Groq, Hugging Face, FAISS, DuckDuckGo

- Built a conversational AI chatbot using **Groq's LLaMA 3.3-70B** for intelligent query responses, integrating real-time web search and document understanding.
- Enabled dual-mode operation: **Document Q&A** via FAISS + Hugging Face embeddings (PDF, DOCX, TXT) and **general chat** with live DuckDuckGo search results.
- Engineered a scalable backend using **FastAPI** with smart chunking, memory management, and logging; designed a responsive **React.js** frontend.
- Implemented semantic search, conversation history tracking, and efficient LLM pipelines, ensuring performance and extensibility for future AI tools.

Quiz Nest - Exam Portal Live-Link

React, Express.js, MongoDB, Node.js

- Implemented secure **authentication** for admins and users using **JWT**, ensuring data integrity and personalized access control.
- Architected a robust **role-based access control (RBAC)** system, enabling distinct functionalities for admins and users.
- Designed an intuitive and responsive exam-taking interface with **React**, enhancing user experience and engagement.
- Built admin functionality to create and manage exams, including question banks and settings, using **Express.js** and **MongoDB**.
- Developed a comprehensive **reporting system** with detailed performance analytics, providing users insights into their exam results.

Technical Skills and Interests

Programming Languages: C/C++, JavaScript, HTML5, CSS, React.js, Angular, Python, Java (Basics)

UI/UX Design Tools: Figma, Web Prototyping

Web Development Tools/Frameworks: Node.js, Express.js, Git/GitHub, Redux, Bootstrap, Ant Design, Postman, Docker, Next.js,Vercel, Netlify, Heroku, Render

Cloud/Databases: MongoDB, Firebase, MySQL, Redis, AWS (EC2, S3, Lambda ,Amplify,IAM)

Microsoft Tools: Microsoft Excel, Microsoft Word, Microsoft PowerPoint

AI Business Intelligence: Conversational AI, Text-to-SQL, RAG pipelines, AI Agents for internal tools

Data Engineering Concepts: ETL Pipelines, Data Warehousing (Bronze/Silver/Gold layers), OLAP, Columnar Databases, Magic ETL (Domo)

Vector Databases & Retrieval: FAISS, ChromaDB

Relevant Coursework: Data Structures & Algorithms, Operating Systems, OOPS, DBMS, Machine Learning, Artificial Intelligence, Software Engineering, Computer Vision, Image Processing

Achievements

- Achieved the **Meta Front-End Developer** Professional Certificate, demonstrating strong foundational skills in front-end development through rigorous coursework and practical projects.
- **Led a project team for 2 years**, focusing on discussions and projects related to machine learning.
- Solved **250+** DSA Problems maintaining strong programming and problem-solving skills.
- Provided ongoing support for the website development of the official website for the **Indian Institute of Information Technology, Kalyani**, collaborating with the college website team to ensure smooth functionality and user experience.
